What is QuantiModo?

QuantiModo is simply provides better living through data. Automatically import your foods and nutritional supplements from Amazon and other data from dozens of sources. You'll also be able to easily track everything on your laptop and desktop. Your data is synced between devices so you'll never have to track twice.

Tech Stack & Category

Technologies

1. C#
2. ASP. NET
3. REST API 2
4. JQuery
5. JavaScript
6. Bootstrap
7. CSS

Category

HealthCare Monitoring

URL

<https://quantimo.do>

The image shows a screenshot of the Quantimodo website, tilted at an angle. The top navigation bar includes the Quantimodo logo and links for 'Studies', 'Services', and 'Apps'. The main content area is divided into four vertical steps: 'Collect' (with a code icon), 'Aggregate' (with a right-pointing arrow icon), 'Analyze' (with a brain icon), and 'Publish' (with a document icon). Below these steps are descriptive paragraphs: 'Collect' explains customizing experiments to measure variables; 'Aggregate' describes importing data from experiments or a database; 'Analyze' mentions access to data mining algorithms; and 'Publish' notes customizable experimentation. Below this is a section titled 'Import Participant Data' with a sub-header 'Types of Applications Using the Platform'. This section lists four application categories: 'Healthcare Provider Applications' (with a doctor icon), 'Telemedicine Applications' (with a computer icon), 'Researcher Applications' (with a graduation cap icon), and 'Corporate Wellness Applications' (with a group of people icon). Each category has a brief description of its use. A 'Get Started For Free' button is positioned below the application types. At the bottom, a section titled 'Check Out These Cool Apps Already Using the Platform!' features four app thumbnails: 'Quantimodo WordPress Plugin', 'MoodiModo For Android', 'MoodiModo Chrome Browser Extension', and 'MoodiModo for iOS'.

Key Features

- Quantimodo allows you to import your user's data from a wide array of applications and devices
- Easily track mood, symptoms, or any outcome you want to optimize in a fraction of a second
- Create reminders to track treatments, symptoms, emotions, diet, physical activity and anything else that could influence your outcome of interest
- Import your data from over 30 other apps and devices like Fitbit, RescueTime, Jawbone Up, Withings, Facebook, Github, Google Calendar, Runkeeper, MoodPanda, Slice, Google Fit, and more
- Analyze your data to identify which hidden factors are most likely to be influencing your mood or symptoms and their optimal daily values
- Export and email your data to your healthcare provider
- Embed QuantiModo's data aggregation and analytics functionality in your own app

How it Works?

Quantimodo Collect data on symptoms, treatments, diet, sleep and anything else using one of many apps and devices. Import collected data from a wide array of sources and analyze using predictive analytics to the data to see what hidden factors are most influencing the things you want to improve. Optimize and keep trying and tracking new things until you perfect your life.

Thank You!
